

Professional Foot and Ankle Centers

For the past 30 years, Dr. Ernest Lefever has provided exceptional foot and ankle care to the residents of Lapeer and the surrounding communities. In November, Dr. Lefever will leave the practice for his hard-earned and well-deserved retirement. Dr. Lefever will be greatly missed by patients and office staff, alike. Dr. Lefever certainly leaves big shoes to fill!

As Dr. Lefever retires, Professional Foot and Ankle Centers is happy to welcome Dr. Christopher Hehemann to the practice and the Lapeer community. Dr. Hehemann accepts the challenge of filling Dr. Lefever's shoes, and looks forward to serving the community according to the high standards that Dr. Lefever has set.

Dr. Hehemann earned a Bachelor of Arts degree in Chemistry from Kent State University in Kent, Ohio. He graduated Magna Cum Laude, with honors. He then completed his four-year Doctorate of Podiatric Medicine at The Ohio College of Podiatric Medicine (Kent State University) in Cleveland, Ohio. Dr. Hehemann maintained a 4.0 GPA throughout all four years of medical school, and graduated valedictorian with honors. Dr. Hehemann completed his training in a three-year foot and ankle surgical residency at the Cleveland Clinic and HealthSpan in Cleveland, Ohio. As a third-year resident, he was appointed chief resident and assumed additional roles and responsibilities

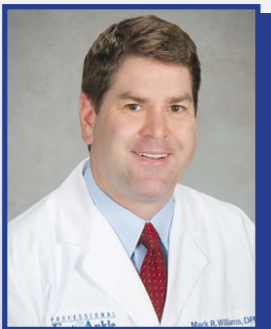

for the residency program. During his residency, Dr. Hehemann had the privilege of training under many prominent physicians, including Dr. Mark Hardy, Director of Education of the Asia Pacific Society for Foot and Ankle Surgeons, and Dr. Jordan Grossman, past President of the American College of Foot and Ankle Surgeons.

Dr. Hehemann's residency provided extensive training in reconstructive foot and ankle surgery. Working with and training under such influential physicians also allowed Dr. Hehemann to gain the experience and knowledge necessary for treating a wide range of pathology. This pathology includes ingrown toenails, bunions, hammertoes, heel pain, flat feet, Achilles tendinitis, sports related injuries, and everything in between. Dr. Hehemann believes that all foot and ankle related pathology can be debilitating and life-altering for his patients. He is excited to work with patients in order to decrease their symptoms, improve their quality of life, and get them back to doing the things they love.

Dr. Hehemann is currently accepting new patients at both the Davison and Lapeer offices of the Professional Foot and Ankle Centers. He looks forward to serving the residents of Lapeer and the surrounding communities.

How could 10,000 patients be wrong?

"Trigger your brain into releasing A LOT of FAT"

A tiny dose/spray under your tongue – safe and natural – triggers your brain into releasing about 2000 calories of FAT OFF your body. As the fat comes off your body- the nutrition that's stored in you fat-goes back to feed you.

Now, you can go on a lower calorie diet – without starving. Normally when you go on a low calorie diet – your brain goes into shock-thinks its starving-holds on to the fat; you become tired, stressed, irritated, you lose muscle mass and your metabolism crashes! With our protocol everything is reversed. You lose fat and excess water weight-not the muscle mass (we know because people lose 40lbs in 40 days and there is NO loose skin). Your metabolism is usually improved. Within the first ten days you will lose so much weight that you think you are stepping on someone else's scale (8-20 lbs) NOW YOU ARE HIGHLY MOTIVATED!!

Next thing you know-all your clothes are loose-but not your skin – your face sculpts out-it does not emaciate in. So everyone is asking you what you are doing. It is not a magic pill-but we believe it's the closest thing to it. We book for free consultations. When you are in our lobby you will see people coming in for their ten day follow up-ask them what they think of this program, how much they lost-how they feel and if inches are melting off their body.

No Surgery | Not an Exercise Program
No Packaged Foods | No Diet Pills
